COMPANY PROFILE

POWER IT SOLUTIONS
SDN BHD 1112624-U

ABOUT OUR COMPANY

[Formerly known as Qaseh IT Solution Sdn. Bhd]

Power IT Solutions Sdn Bhd was incorporated on September 4, 2014 to provide cutting edge IT solutions and professional IT services in Malaysia that committed to supply talented IT resource and solutions by outsourcing service to the clients. We train our engineers and technologists' in order to keep up to the latest expertise and solutions, so that they are capable of providing prompt, efficient, and effective quality service and support.

Over 5 years of service, we have been engaged by large companies in Malaysia by helping with their IT needs and infrastructure. We provide our customers highly scalable solutions as per their requirement. We pride ourselves on our responsiveness, agility, and flexibility; in short to support customers business objectives.

RESOURCES

Project Manager

Technical Lead

Scrum Master

Database Engineer

Mobile Developer

Business Analyst

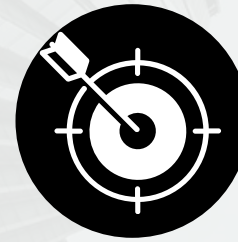

System Analyst

Data Analyst

Quality Analyst

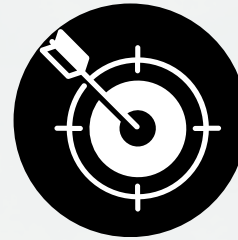

IT Support

RESOURCES

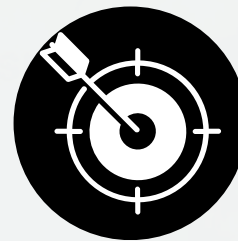

Project Manager

A project manager is a professional in the field of project management. Project managers have the responsibility of the planning, procurement and execution of a project, in any undertaking that has a defined scope, defined start and a defined finish; regardless of industry. Project managers are first point of contact for any issues or discrepancies arising from within the heads of various departments in an organization before the problem escalates to higher authorities, as project representative.

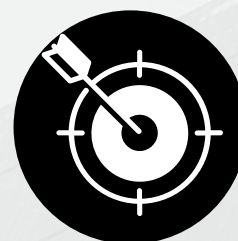

Technical Lead

Technical leads take charge of technical teams. While their duties vary depending on the industry, they typically ensure the smooth functioning of technical operations, monitor and evaluate staff progress, assist with training and recruitment, set goals, and ensure overall client satisfaction.

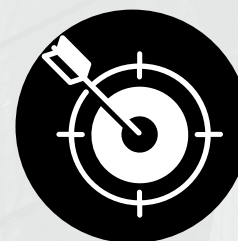

Scrum Master

Determining and managing tasks, issues, risks, and action items. Scheduling and facilitating scrum events, meetings, and decision-making processes. Monitoring progress and performance and helping teams to make improvements. Planning and organizing demos and product/system testing.

Database Engineer

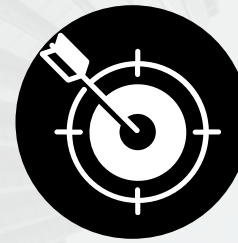

Database engineers, also known as data engineers are responsible for designing and implementing digital databases. They use computing tools to create new databases or adjust the function and capacity of existing databases.

Mobile Developer

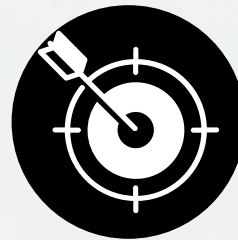

The typical responsibilities of mobile developers include: discussing the client's requirements and the proposed solution with colleagues. developing application programming interfaces (APIs) to support mobile functionality. keeping up to date with the terminology, concepts and best practices for coding mobile apps.

RESOURCES

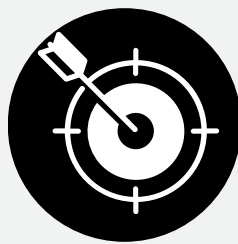

Business Analyst

A Business Analyst is a professional who works closely with stakeholders to identify goals, develop best practices for data collection, and analyze current processes to determine what can be improved to achieve their desired outcome.

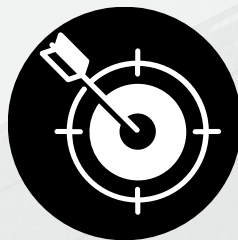

System Analyst

Systems analysts implement, maintain, and support IT and information systems to meet the business needs of organizations and scale as organizations grow. They analyze and create tests, and develop specifications and requirements for developers and programmers to follow.

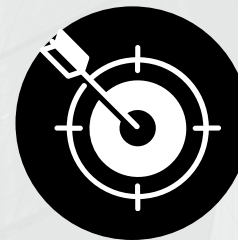

Data Analyst

Data analysts collect, organize and interpret statistical information to help colleagues and clients use it to make decisions. Data analysts gather and scrutinize data using specialist tools to generate information that helps others make decisions.

Quality Analyst

Quality Analyst responsibilities include performing quality tests and validating test cases before products, software and systems are shipped to consumers. Ultimately, you will work with a small team to ensure our products meet our organization's quality standards.

IT Support

Commissioning and installing upgrades, repairs, maintenance programmes and data transfers. Solving problems with various appliances, including printers, scanners, desktop and laptop computers, handheld devices, and servers.
